[Recycling: Putting An End To Junk Mail](#)

This article explains a few things about Recycling, and if you're interested, then this is worth reading, because you can never tell what you don't know.

In an average week how much junk mail comes to your home? For the average American family, with two adults and two children, they could probably weigh their junk mail at the end of any given week to equal the weight of a small animal. An average American home can get items from; clearing houses, credit card offers, insurance offers, lottery winnings, mortgage advertisements and promises of lowering monthly mortgage bill, college flyers from schools all over the United States, entries into contests that had never been entered in the first place, solicitations from charities and the ever present retail catalogs!

Along with the simple fact that all of these items are unnecessary and annoying, the amount of waste they create is drowning the average American family in misused, unread paper. How can this issue be dealt with and the waste be reduced, or never pro-duced, for Americans all over the country?

The answer to that question is, yes, there is something we can do to stop the madness of junk mail that litters our mail delivery every single day! There is a group that has done all of the work for us, and they have all of the information needed to put an end to the junk mail that we are assaulted with in just a few easy steps and with the patience of a few weeks.

Is everything making sense so far? If not, I'm sure that with just a little more reading, all the facts will fall into place.

First you order the Junk Mail Reduction Kit for \$15.00. Once you have purchased your kit, you simply sign on to the website and have the kit activated by clicking on the appropriate link. It is as simple as entering your name and address and the names of any other people living at your house, even variations of a name that appears on junk mail can be added. The next step is to register your name and the names of the others at your address with the Direct Marketing Association Mail Preference Service, which will remove the names from hundreds of mailing lists. This service is a one time fee of \$1.00 per name and along with monthly monitoring to ensure your name remains off of unsolicited mailing lists. The option of having mail addressed to "resident," "occupant," or even "neighbor," can be done, too.

Because the fact that conventional or "snail" mail isn't instantaneous, it will take a few weeks for things to get rolling but in a few short weeks you will receive customized pre-printed postcards to sign, stamp and mail in and your name will be removed from as many lists that have your name in their data base.

Eventually all of the companies that have your name will be notified and the endless barrage of junk mail will cease. If a piece of junk mail finds its way into your mailbox, simply sign in to your online account and have your name removed as quickly as possible. Just imagine the impact of one house on one street in one town will make and why shouldn't it be YOUR house?
